

a**b****c****d**

[placeholder: predicted vs measured trigenic interaction on the validation split, DANGO STRING v9.1 run 014mprap. Needs the run's best checkpoint (DATA_ROOT/models/checkpoints/compute-3-3-1941704_ff85.../014mprap-best-*.ckpt), the 006 dataset LMDB, and experiments/006-kuzmin-tmi/scripts/dango.py with regression_task.execution_mode=inference]

e

[placeholder: absolute error vs $|r|$ on the validation split, DANGO (014mprap) beside CGT (c7671wgj best-pearson-epoch=24 checkpoint). Needs both checkpoints, the 006 and 010 dataset LMDBs, and the prediction dumps from dango.py inference and equivariant_cell_graph_transformer_eval.py]

f

[placeholder: per-STRING-channel weight of DANGO's meta-embedding attention on the validation split, STRING v9.1 vs v12.0 checkpoints (014mprap, 9jpfy547). Needs both checkpoints and a forward hook on torchcell.models.dango.Dango meta-embedding]
