Table 1: E. coli + P. putida datasets (pre-build, 2026-10-15; E. coli + P. putida) built as LMDBs in the TorchCell dev tree. *Genotypes* and *Env* count distinct stored genotype and environment payloads; *Instances* is the record count; *Signal (gzip, bits)* the gzip size in bits of the concatenated stored instances (perturbation + environment + phenotype), as in the yeast table.

Dataset	Host	Genotypes	Env	Instances	Phenotype	Shape	Graph role	Signal (gzip, bits)
