Both-label train / val / test
split seed 0: 1,103 / 125 / 121
split seed 1: 1,099 / 126 / 124
split seed 2: 1,102 / 119 / 128
split seed 3: 1,108 / 122 / 119

Each split seed is an independent draw.
Round v19 uses split seeds 0 to 11; counts are on file for 0 to 3.

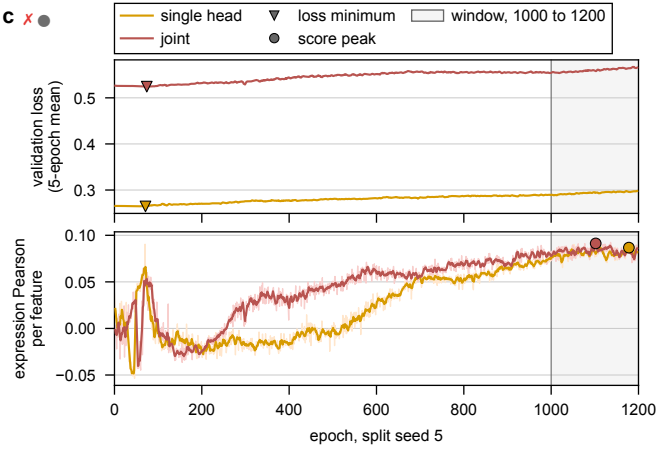

Every arm of a split seed shares its strains.
Single-head and joint arms see the same rows, steps and batches (v19 configuration).

One initialization seed per split seed.
A split seed fixes the partition; it is not a replicate of one partition.
