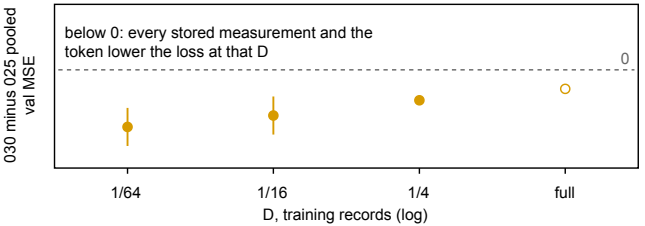
sketch, no data: the 025 twin against the 030 arm at 180x8

a

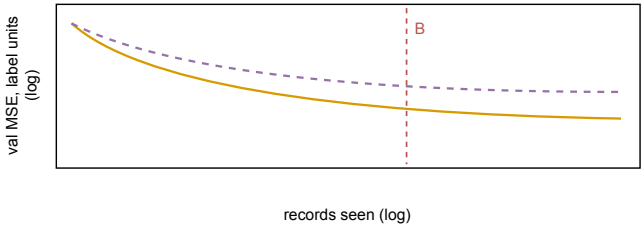
P1 The 030 minus 025 gap against D



seed mean and sd where both sides have three seeds; the full point is two unconverged ten-epoch runs, hollow

b

P2 Paired learning curves



one panel per subset in the real figure (here 1/16); 030 orange, 025 purple dashed; B marked; a gap that holds past B is supervision, one that closes is a faster start
