
pathway multi-hot + ProtT5; gated + a head over the GEM-box solve's flux (cached, nothing learned in the layer)
pathway multi-hot + ProtT5; FBA affine + the deletion's pFBA vector as an input (no flux layer)
the same vector, the affine's solve columns zero-initialized
the vector as log(1 + |v|), default initialization
the vector as log(1 + |v|), solve columns zero-initializ
